**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 11, 20 rejected under 35 U.S.C. 102(e) as being anticipated by Deng et al. (2005/0146764).

Deng discloses an illumination light source comprising:

a coherent light source (20);

beam scan means 922) for scanning light from the coherent light source; and

a correction optical system (23) that corrects a scan angle of a beam scanned by the

beam scan means a projects light onto a surface interpreted as a screen,

wherein:

the beam scan means is formed of a mirror portion and mirror portion oscillation means;

and the mirror portion clearly is driven by the mirror portion oscillation means at or in a vicinity of a primary resonance frequency of the mirror portion.

3. Claims 11, 17, 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Cannon et al. (2005/0024701).

Art Unit: 2851

Cannon et al.. discloses an illumination light source comprising:

a coherent light source (104);

beam scan means (50) for scanning light from the coherent light source; and

a correction optical system (150 or mirrors (200)) that corrects a scan angle of a beam

scanned by the beam scan means a projects light onto a surface interpreted as a screen,

wherein:

the beam scan means is formed of a mirror portion and mirror portion oscillation means;

and the mirror portion clearly is driven by the mirror portion oscillation means at or in a vicinity of a primary resonance frequency of the mirror portion.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cannon et al..

6. Cannon discloses the invention substantially as claimed but does not specify the use of red, green, and blue coherent sources.

7. It would have been obvious to one skilled in the art to modify the device of Cannon et al. by the use of a multicolor source in order to provide color imaging.

***Claim Rejections - 35 USC § 112***

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
10. Claim 19 has not antecedent for “the green coherent light source.

***Allowable Subject Matter***

11. Claims 12-16, 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
